

The Starting of a Patriot Group

A Basic How To.

Straight forward;

WTF am I right, what is the deal with the money, with the food, with the government? Why is fluoride bad to consume, why was it put there, who runs the banks, who runs the country why are they the same?

If you have been AWAKE long you have begun to find there is a counter matrix of understanding. One that explains the symbology of your money that you were never considered smart enough to have input on. We know of the counter groups controlling the public matrix which has moved from Hollywood to Washington.

Against the rules and against the odds we have watched as both the democrat and the republican have worked the to do list of the New World Order. We see the bullshit cover given by big news agencies when they tell us we are screwed. We are AWAKE.

Clearly some of our own government and civic and even industrial officials have stated an allegiance to this one world government directive and this New World Order and even other control groups and secret societies.

The non affected governmental entities tend to be unresponsive or unable to fight a counter attack of this magnitude and power. They are often incapable of self correcting or cleaning out these false leaders from their own small positions of government.

The biggest danger to that counter or dark force is the rise of an organized group or groups that are outside of their range of control. That my friend is you and me.

So in preparations for taking us on they have set in place lexicons and other official resources so that those like us are to be considered dangerous extremist. This way we might stand out and be easy to see.

So brother, even attending a constitutionalists meeting now makes you a target. Laughable considering the average attendance at a constitutionalist meeting is richer in pens and books then men and guns.

You need only study a little history to find that when dark leaders have full control, your patriots will be labeled terrorist. The march towards control of the world by evil men has been around forever and will continue but you can live through it as many have. You can even cause it to bend and change.

But it takes resolve and ACTION. Meeting are great for morale and awareness but all the talk in the world will not stop these evil men so we build groups towards ACTION.

Learn my friend, like the "Mini manual of the Urban Guerrilla" by Carlos Marighella and "Invisible Resistance to Tyranny" by Jefferson Mack and even "150 Questions to a Guerilla" by Alberto Bayo Giroud we learn through the study of our history as man. We also learn that our types of activist are best kept under cover. The oppositions to Americanism is Communism and we know how they treat their patriots.

These books are as well a great way to find out where a prospective recruit falls in line with you.

We are unified in our decision that we will no longer act as sheep but would rather put our day's energy and efforts to destroying the private matrix. It doesn't exist any way supposedly so we are clearly doing nothing wrong when we are caught red handed on occasion.

We work together within our comfort zones its true but we are special in that we will be encouraged to weekly challenge our own comfort zones or within a few months we will know those amongst us that are best in another 5 that are best used for something else.

We are activist 52 weeks a year. Ok 48 but you get my point. Some that you will recruit will clearly be more talk and fantasy then activist. Move on don't be so quick to recruit into your top 5. Have a picket group, a night action group, a canning group, a shooter group, an energy production group, what ever but not every one is right for *your* top 5.

PLEASE do not start a knitting circle and call it a patriot group, if I stagger in with a bullet whole needing a ride and some ammo, you might not feel as at home as I do. But if you're a true patriot group you will have me safely covered while you investigate my story. If I'm legit you will twist your minds trying to help me finish my task and go safely home. Know this; I will do the same for you and so will my boys.

Hears the interesting part, in my camp you will see them all, and from all camps, don't you ever pull your blade here because of what you perceive from the public matrix.

Here we are all patriots in like cause. I have more gang tats in my army then the Marine Corps. None of them belong so close to each other. Until you factor in the desire to save this country of ours, then all bets are off and what ever it takes is just enough.

No dividing line you say, what is this? Ok well no. there is a line here. Two in fact. No rats, tattle tales, narks, you know no pussies I think is the

common descriptive. And this, we are a Judeo Christian organization. We believe in God as in His son as a means to salvation for the gentile it's a common bond between our men at this time and so it offers common and basic understanding.

As Gentiles most of us sinners still, we will talk here in our circles in the basest of terms. If you want to say, shiite, republican, police, agent, russian, democrat what ever fine you do that, we speak in the terms that those who would hunt and kill men are from the dark lord Satan and those who would fight for the oppressed as workers of the light of God.

We believe it doesn't matter if the current agent of death is a Pollock or Aggie. We don't care if he works for the US or the USSR whether he is a supposed Jew or Baptist. His actions make him clearly and agent of darkness. Simply by his willingness to do this thing against humanity he has left himself open to being used for clearly dark reasons.

So we are not fanatical when we discuss dark forces and at one moment the agents of death are American and later they are UN. We are adult enough to simply see where those in discussion have lent their efforts to the same dark deeds or efforts.

So with that said lets get active and build our own future.

*A short note here on hell sent to the new recruit from an old patriot

“Most of what you will do you can be proud as *hell* over but that doesn't mean it's the topic of conversation at the bar. Please learn to shut the *hell* up.”

Boys will be boys, man I love this stuff.

To the new patriot, the established recruiter,
and the growing patriot group.

I write concerning the newcomer, the new patriot or those newly awake.

Welcome. Now please go to activist events and be active. Look for our signs and symbols. We will help you build yours where you are too.

Don't give up, and don't get overwhelmed or feel out numbered. Please know that we outnumber the agents of tyranny.

Be assured as you climb in consciousness that as you reach each plateau we are there and you will find it colonized.

To the recruiter, remember the dangers of talking too much. Remember the Patriot Slide "copy enclosed" and how to avoid it. Give young members copies of only a few pages until you know more. The group should be established and operational before moving forward.

To the established Patriot group I want to say there are now in your numbers those who would serve at any level, even hopefully those that would give their lives for the cause.

Each is a group to be respected not one as better than the other but as each man answers his own call to serve in the way he knows best. Help everyone and pray for those who take a harder task than you trying to do their part.

We believe the only world changing thing happening in 2012 is the change of consciousness. Potentially the hunted and the hunter trade spots. May God bless your efforts forever.

You're Fellow Servant in Christ

Starting a Patriot Group.

How to stop being alone in the world. How to gather things that are good and lose things that are bad through your individual and family efforts as a patriot.

Building the group before it gains directives.

Part 1

Another Patriot awareness tool for your good growth

J&J forms

The Modern Patriot Group

Mr. and Mrs. Smith are an engineer and a teacher in their professional life. They are paid a wage as are you and I but a portion is set aside for a patriotic cause.

A portion of the family budget goes to the patriotic cause which are the **directives** set in defense of the continuation of their Constitutional form of government and their American freedoms as they were intended in the bill of rights.

Their personal week is as well divided and proportioned to allow for activism in areas of their own interest. Oh sure, the Smiths do a lot together in the form of rallies and other activism but each does their part individually as well.

You see Andy engineers the ideas of his larger patriot group through connections plus he visits the sights of working patriots who invite his support and God given wisdom to complete their own task. Andy enjoys seeing grass roots and inventive approaches to old problems and loves helping good citizens to prosper around him everywhere.

Mary, however, teaches a subgroup of teachers who are invested in home schooling. She lends credibility and an understanding of the current federal standards to their grass roots programs, designs and ideas. She reviews the considered curriculums and together they have created a balanced school environment that Mary believes will produce students that will truly challenge her students at the public school in the modern and working world.

She has her own children in the group of off grid students and loves the fact that her daughter loves the stories of Jesus and can recall each one. She loves the fact that her rambunctious son prefers the stories of David, that he is unmedicated, encouraged to be different and an individual of his own respect.

Together, Mr. and Mrs. Smith run a secret garden on an acre of land they own. It is secret because in an emergency the Patriot family intends to live off the food they have worked hard to keep and tend.

They are not assuming that man can live on salad alone, so they have networked with Mr. and Mrs. South who help in the garden some, but trade some of the secret garden for fresh chicken and eggs.

Mr. and Mrs. East own a little butcher shop and they are supplied by only local and home town sources for natural, clean and healthy meat products. They, too, trade for some of the private labors of the Smiths. They, too, are activists against the N.W.O.

But the Smiths grow enough produce for yet four other families. So what do you imagine they do with this extra produce?

One portion they trade religiously with Mr. and Mrs. North. Mr. North is a talented mechanic. His labors are in return dedicated and assured to the Smiths at a great discount or if possible sometimes free. In an emergency, Mr. and Mrs. North have sworn to serve the needs of the group in return. So far that Mr. North has acquired books and manuals and electronic media that help him serve their needs even now in the day to day. He gets eggs and chickens as well you see. He was one of Andy's "wake ups" and is learning more weekly.

Another large portion of the produce goes to Ben, his young wife, their 3 sons and new baby. Ben is a gunsmith and can build a weapon from parts off a tractor. His boys are marksmen shooters and together they carry a heavy arsenal.

Clearly, what Ben has that not many who are meek like the Smiths have, is assurance. Personal safeties are apparent and assured. Ben has been sought out just as were Mr. and Mrs. North.

But Ben's work in the group is primarily parts, ammo, special orders for the group and even some training he has benefited from because of the like interest of the group. He has given secret gifts and services to the members and would never disclose what each other member is holding. In fact he regularly "closes" records and gives all remaining subject matter to the patriot or family it which it pertains.

Ben and his family are activists in other areas of service and they offer a great deal of aid in the form of difficult or physical

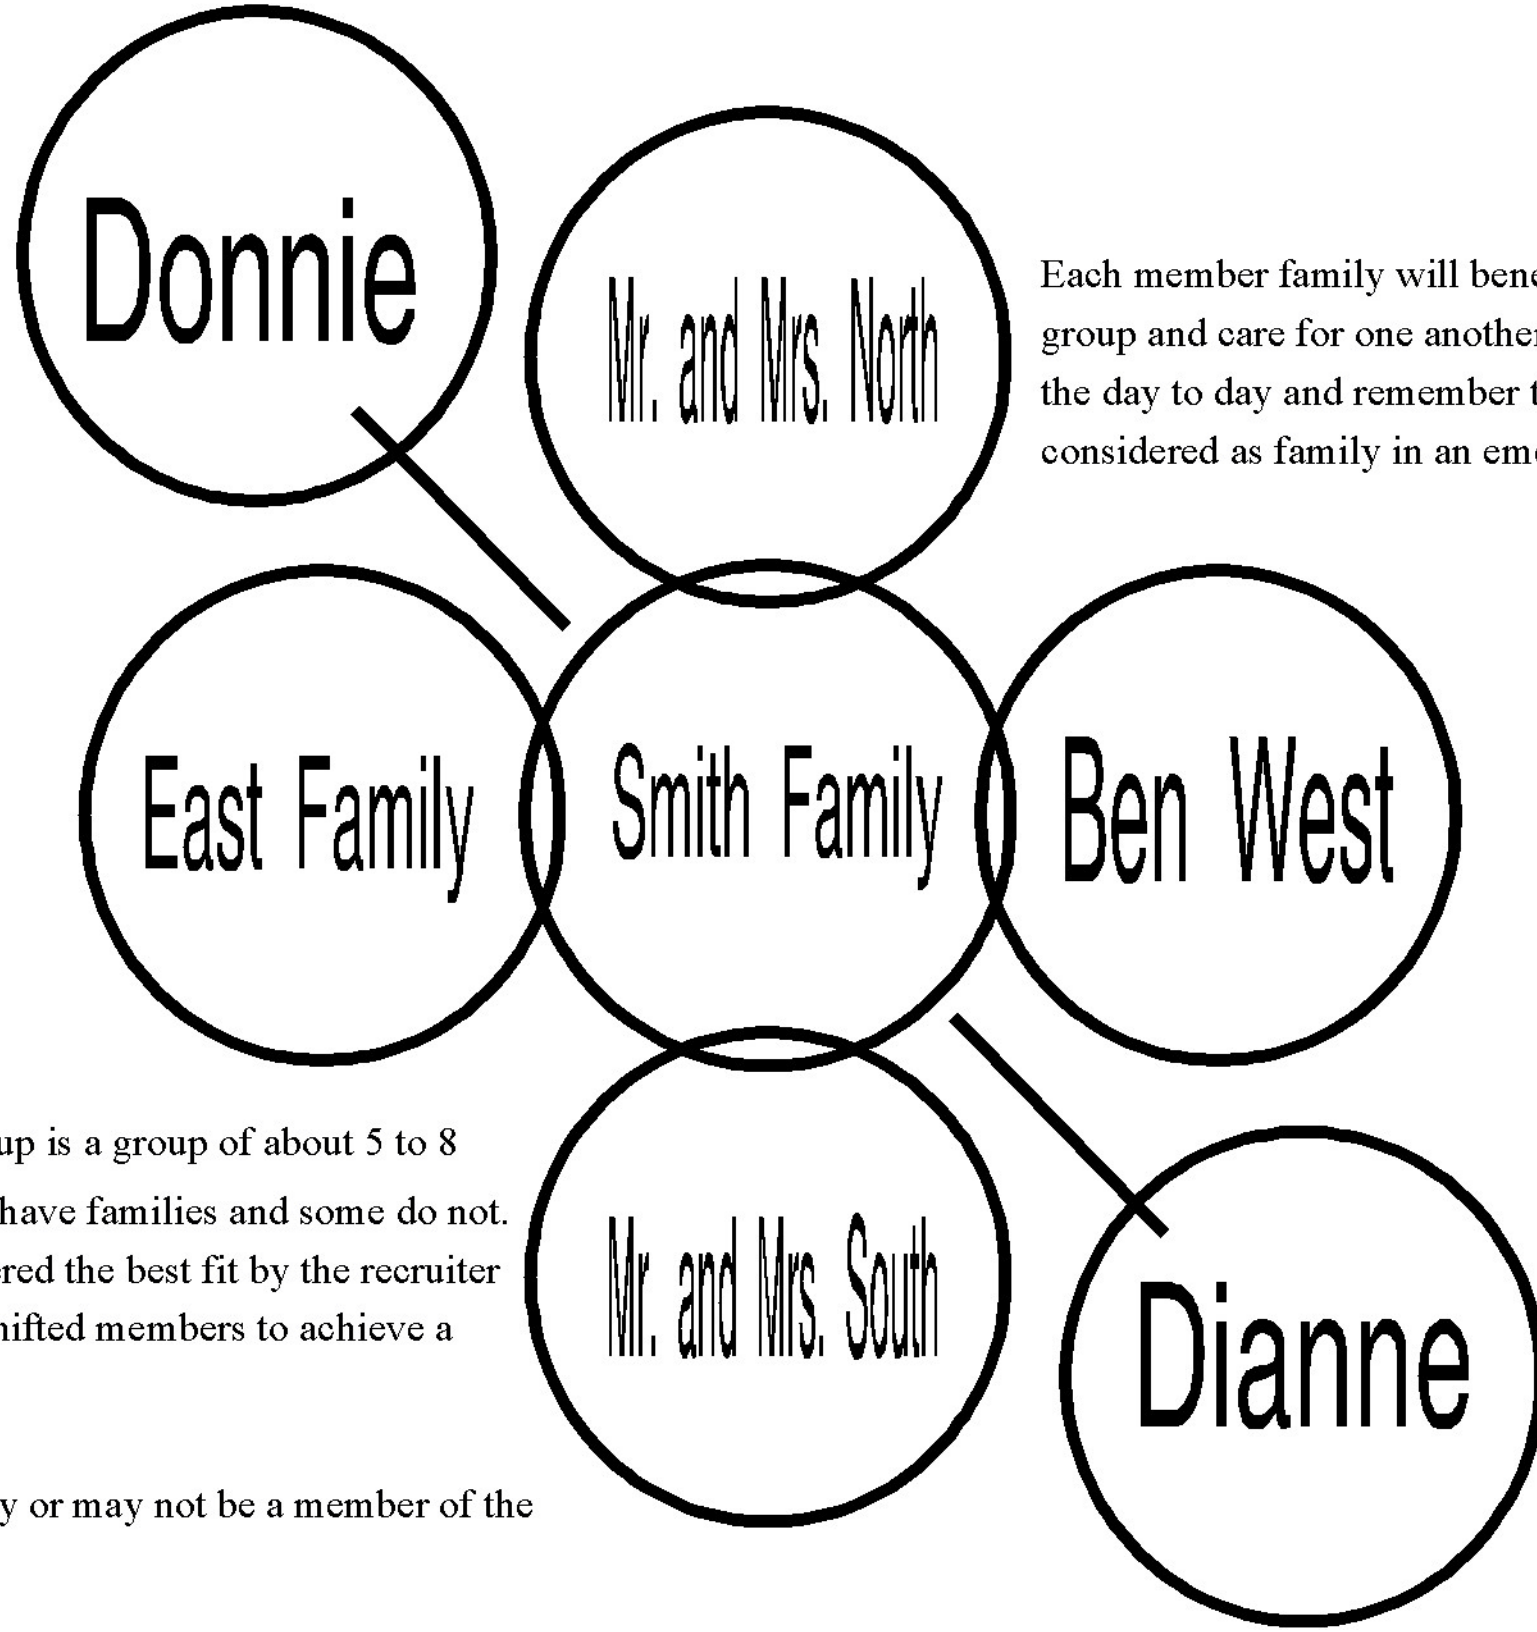

labor. Still less than the Smiths, but still so important.

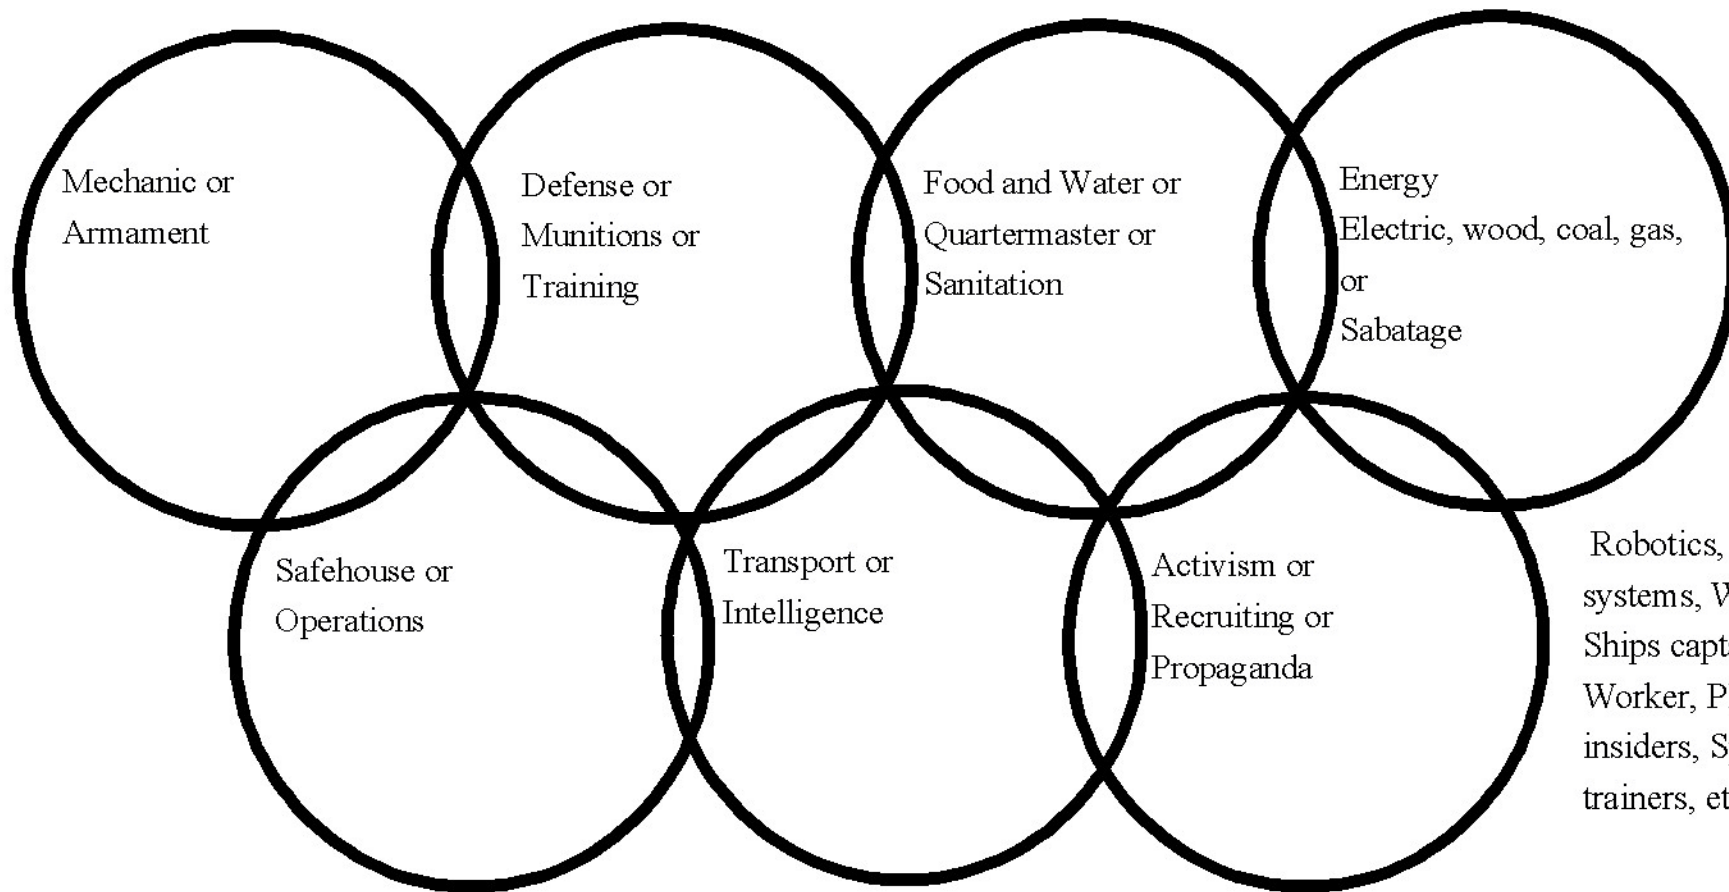

Donny is a single activist and he gets a portion of produce as well as does nurse Dianna. Of course reserving one portion gives them wiggle room in the event things are sparse.

Since that's not the case and the return is always so great, the remnant goes to be canned and juiced or dried by the group for future potential needs and trades.

In this way, an activist patriot family has decided what they can do and sought out those areas of service where there were personal interests or needs unserved. They sought out those members building for themselves a strong little patriot group that might offer each member something of assurance in times of need.

What they have created is a patriot group. There is more safety in numbers, even if just helping us keep our head in times of emergency.

Robotics, Air perpulsion systems, Web builder, Pilot, Ships captain, Construction Worker, Plumber, Political insiders, Special Forces trainers, etc. etc.

List anything you might feel is important enough to have as a group member here.

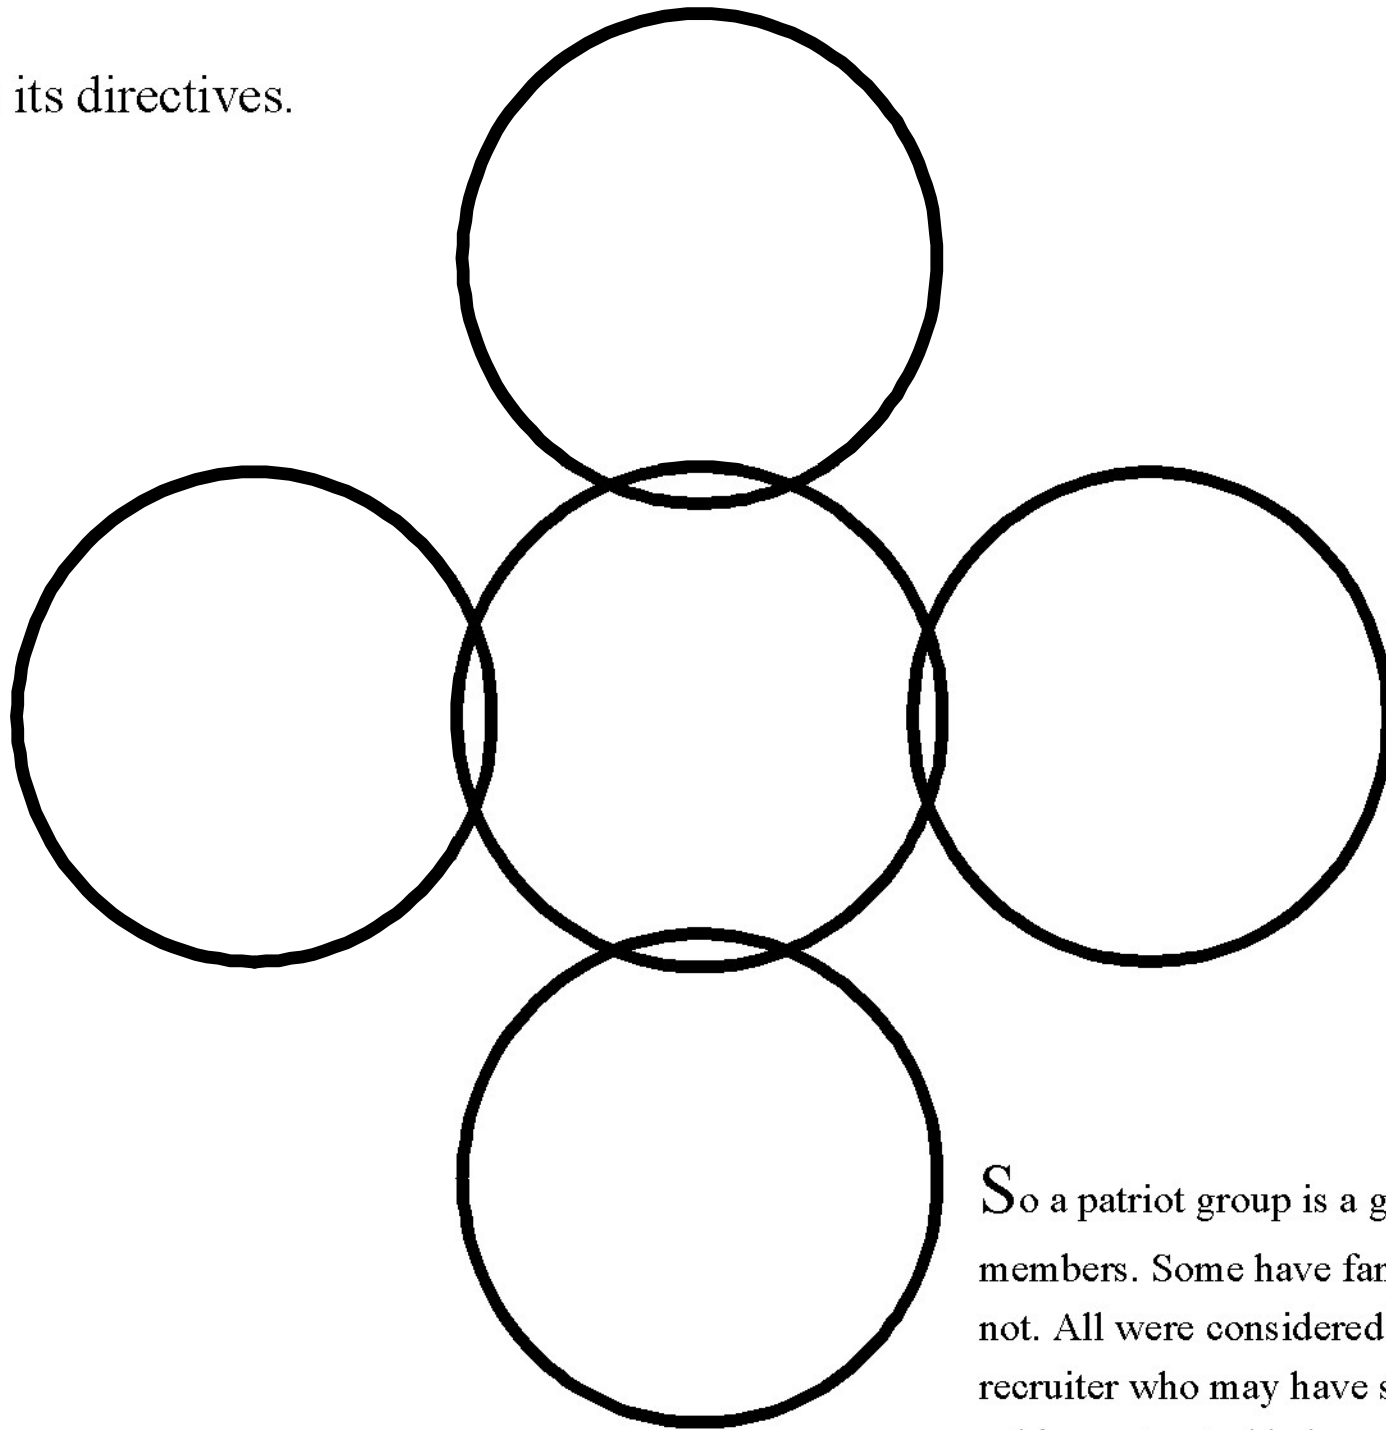

NOTICE*

There is always someone doing it who agrees with your same Patriotic views. Look for them.

Speak to a Patriot recruiter for direction

The Modern Patriot Group.

The group gains its directives.

Part 2

Another Patriot awareness tool for your good growth

7&7 forms

So a patriot group is a group of about 5 to 8 members. Some have families and some do not. All were considered the best fit by the recruiter who may have shifted members to achieve a trusted balance.

So now you have a group, what now?

Well that depends. Were you a patriot group that was built to make love or war? Then do that thing.

Regarding your preparations. Don't wait for "the end." Prepare for it because each is inspired by the actions and input of the others.

Now deal with today's issues in your fifty mile circle. Surely there are dirty deeds done in every man's daylight. If I'm being killed by the dirt bags living in you 50 miles, and you are clueless and do nothing to defend me then potentially you and I are both going to be put off. If I have to come and do your job in your 50 mile radius.

Know those that offend our security, our health, the education of our children, even the health and welfare of the less smart, less capable, even the cold and tired. These are the things that make us good Christian men of God and America. "They will know us by our love"

It is encouraged that you meet for pot luck, some fishing maybe, a Bar BQ even, anything. Maybe the men go hunting. Maybe the women do some canning. Maybe it's whisky and ribs over political debate. "Chances are, you're all on the same side"

We must talk together and in this group there will be no judgments. No hate for free opinion, no harm to its members. They each will know they can speak their mind and not one member will utter a word of it outside the group.

No member will speak out or testify against what was said in those private times and swears to it in the pledge of allegiance. "Because we are the US of A, we are that republic for which it stands."

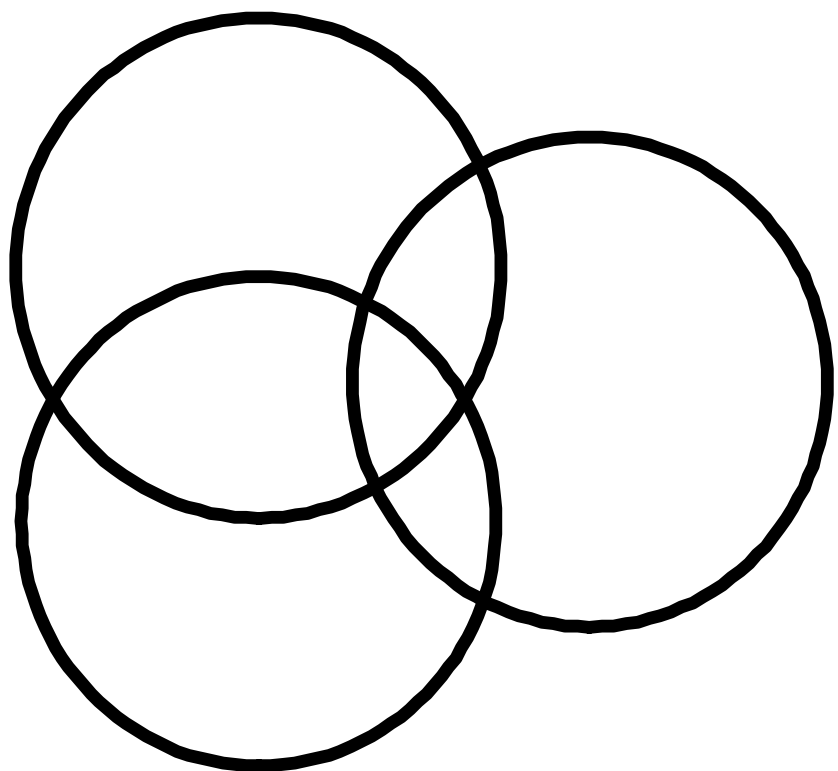

The directives demand this amount of trusted secrecy, if those in your group feel lead to speak of a plan dear to their heart, they must be assured that no one there will judge it, speak testimony about it, or even repeat the conversation outside of the group.

A member who breaks this is not cast out, but broken of the negative trait before dire times require their ability to keep secrets that could save or cost lives.

The private talks of the first patriots would have been enough to get them killed. It's not unfair to say there may be true patriots of that level of commitment in your group. Let's respect them and keep them safe. America needs its patriots now, more than ever.

Even if you're not man enough to join us in the battles, at least be man enough to keep our secrets. Any discussion and resolutions against the agreed tyrannies are acceptable and welcome. Let's discuss those tyrannies. It might amaze you what your group is capable of.

We will better understand one another if we are not having to choose our words and are allowed to speak freely. Let's talk and get to know each other.

Each group is only responsible for covering 50 miles.

Directives

Directives are set at first by those things that bother your group as it influences your community in a negative manor. Maybe your recruiter can help.

It's your community; it's your responsibility as a group, so please stand vigilant for a fifty mile radius of your own area. Combined, you are now with the power of greater numbers.

If there are those who might terrorize, bully, kill, harm or steal from the community at large, either through government action, industrial influence, or organized oppression, or even chemical or power production, those things should challenge the modern man. Those things should still outrage the Patriot in him. They should still inspire in him that desire to restore the good things of America for our own generations.

If he is not asleep or chemically lost to the world, let him pay attention and know the truth. Then, let him rise and join us in this last Patriot Movement!

If he does not, and if this group does not act weekly, then this is not a patriot group. It's a book club or a knitting circle or something other than what is fitting for a Modern American Patriot Group.

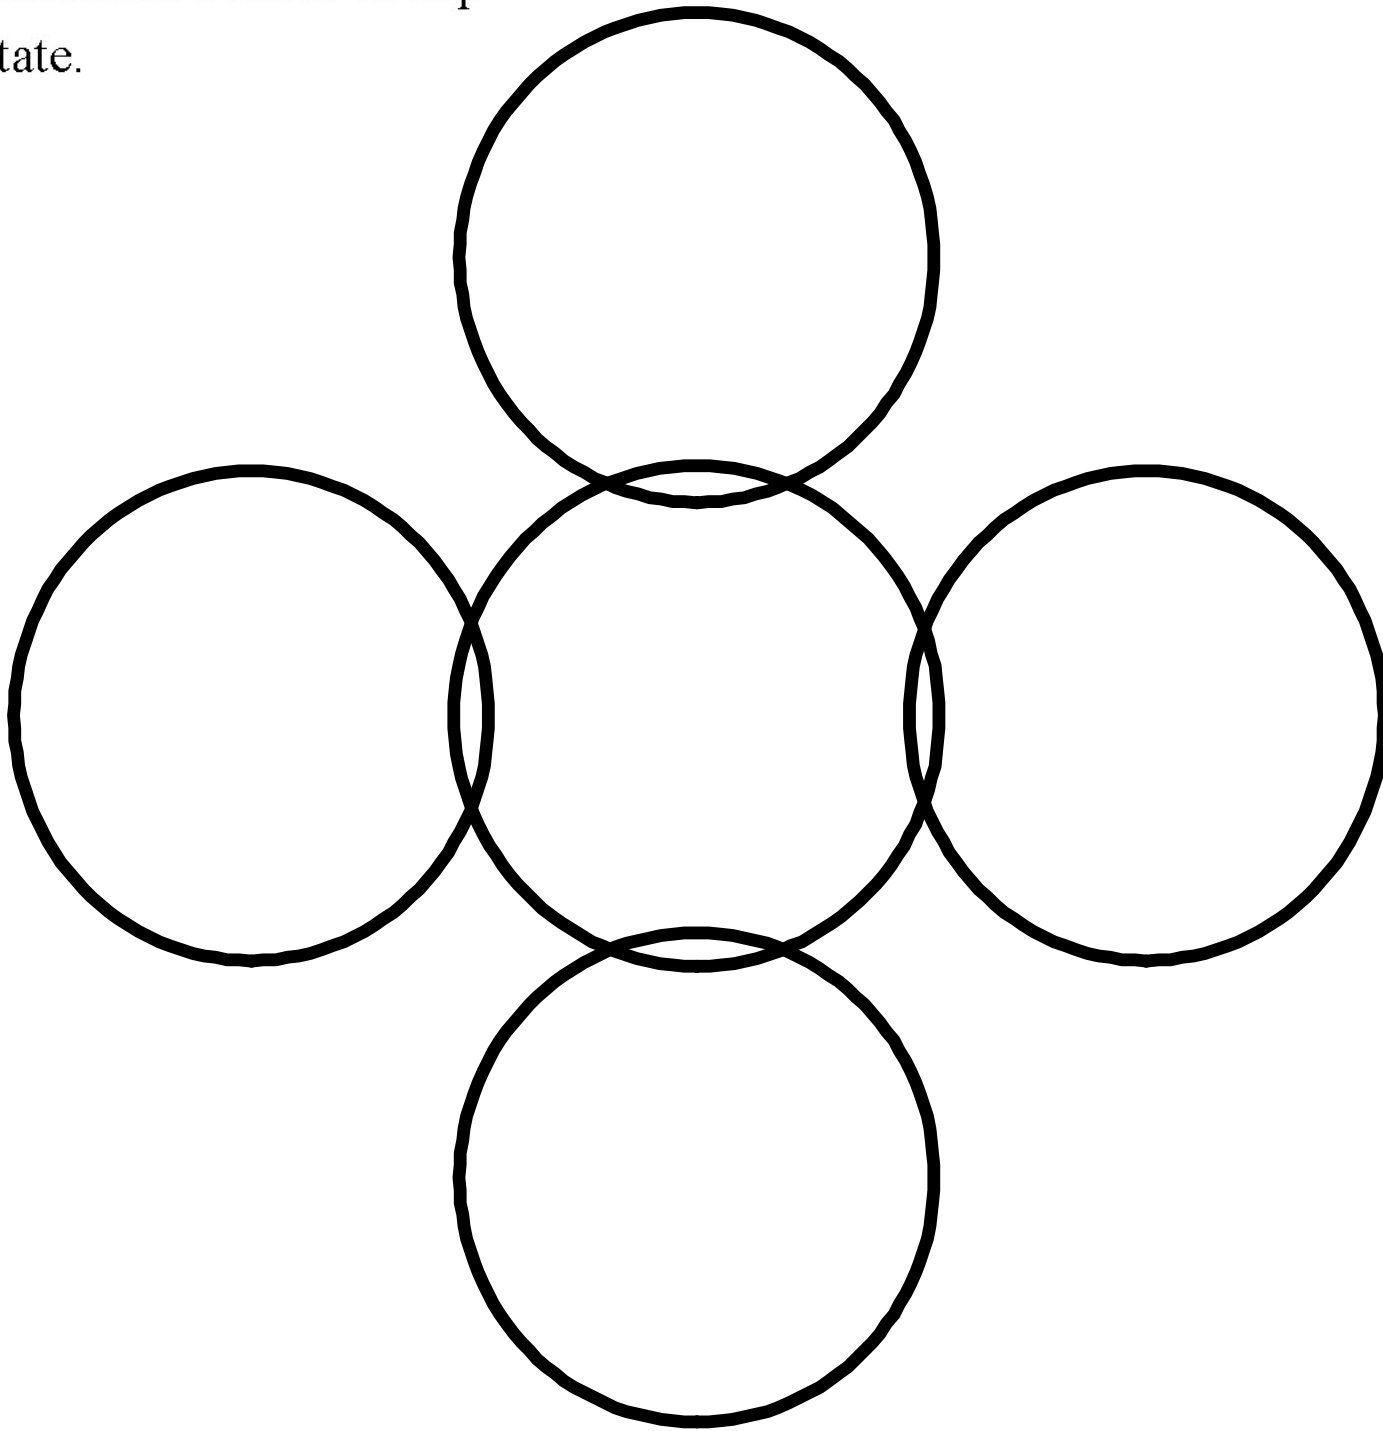

We are activists. If you are something else, please call yourself something else.

As you grow you will learn to reveal your activism and Patriot group to other Patriots and Groups, with signs and symbols. When reading those signs, they will assume you are real men when they approach you. Being less than that will only depress you both.

WORKING together things are achieved. So after bad things are removed from your area, you will begin to discuss what you want to bring to your community. Get started, it's never to late. Know this, we are ahead of you, we are beside you and we always out number and surround the tyranny. We will give you numbers when you need it most.

For more input and resources see your recruiter.

The Modern American Patriot Group
in its mature state.

Part 3

Another Patriot awareness tool for your good growth

J&J forms

The True American Patriot Group

in its mature state is one of extreme activism.

Regarding your recruited members, all members are fully AWAKE or close to it. (Awake referring to the conscious understanding of the tyranny at hand and the patriots' position in regards to that.) Hopefully they are viewing videos and other recourses collected and put in order for good growth. (Attempt to use media that is common and easy to those invested in study.)

Real patriots are hardened like steel by the truths we will find together, they will be stronger when we need them to act. That's why we will get together and review film of real history. So it is that each man is drawn and encouraged to serve in his own way. Firstly though study.

The study of history is important, not the public history but the counter. This is the history repeatedly put down and hidden by some to cover dark and continued attacks on humanity. The truth hurts but it bears studying.

Then study some health issues both personal and group interest should be studied. Morgellions and chemtrails affect the body as do chemicals placed in water and food. Some GMO's mess with more than your stomach. Find out what dark forces are doing to your bodies and minds. Some vaccinations can be more harm than good but ignorance is deadly for sure.

Then study the Directives and the actions of others to learn not to fail like that. Prepare for the directives in direct action. Take on the mindset of the Guerrilla if you intend to play in that jungle. Gain tools and resources in line with your intended service and learn how to use them well.

Preparing only in your mind for events that will be athletic shows a lack of maturity and self control. Such weaker members are put in a third level ring until they improve we need everyone but not everyone is first string. Then grow, learn the things of personal interest that you might like to do or have if everything in town were removed from your life.

Together trading copies and resources seeing the true actions of those dark forces in your studies you begin to see the real players who are the dark powers' foot men and waiters in your area. Research from all views but do not fall prey to believing convenient canned statements regarding issues of importance. If it's important it's worth giving miss information on do your own looking around, boldness is rewarded with achievement.

So one or more member's monitors world and other media and one or more reacts with the planned power and precision of the entire group. Or another group uses the information gathered by the first group if there are enough willing participants in a given area. Recruiting and repeated

action keep you sharp and growing.

Your willingly confrontational, but with restraint and control, maybe someday your even militant, but with out the apparent call to war.

Local government is blown away by your boldness and intervention in these issues.

One group papered the area the night before, another did it during the event with hand outs and others intervened in a mature and astute manor to the authorities. Calmly you drive council members to yell get angry scream and even throw things but your members are so calm and controlled that the police have no issue with you. Other groups may even be visiting with them to give you more time. "Please be careful and don't threaten future actions."

Select your members well but be ready to change positions when you see strengths and weaknesses. Not every man is a good spokesman, not every man is a good soldier, and not every man is in your 5. However possibly you're a recruiter in another 5 that contains your activist wing.

However some feel they want to help by painting and others by singing and some by writing books. They should all be aloud to and supported in their efforts to do so as long as they feel it's important to helping us. But when the action starts its important to have activists of the highest resolve close to you.

Remember the peace loving students at the Kent State massacre brought flowers to a gun battle. It did not go well for them. We find that most men say "when the shit hits the fan I want a scope in my hand." But if they are better trained to paint you still have brought flowers to a gun battle. Train others and with a multitude of guns because the one that saves your life might be the one you find laying in the battle field.

You should start to refer to each other as Patriots from now on because the day will come where if you are worth a damn as a patriot someone will work to darken your name. Make it hard to break your bond one with another it will matter latter. Extremist or not history shows where well organized group systems make it through even times like the holocaust.

You see when there are groups that are strong, there are vile agents of darkness sent to destroy them, so BEWARE. Be strong anyway and know you scar them with pride. Don't ever think your group is to small to be watched.

There are clear historical examples of how the government attacks the single family as well as the group. We can learn from these lessons. First the

family unit, when the government paid Lon Horiuchi to shoot the mother and child in the head at Ruby Ridge, he and other dark agents camped and hunted an American family for many months.

Once again the dark agents killed a families pet first and then began the murder of the family members. First shooting and killing a small boy and then young Lon shot Mom in the head while she held a six month old daughter in her arms.

You paid Lon and then were told they were KKK members, and extremist he killed. Even vile face members of the dark groups like Bill Mahr made fun of their assignations on TV claiming that the KKK members got what they had coming to them.

It took us years to hear of the marksman paid to kill those Americans, the plot to cover it up and even the darker truth that the initial issue was of the government attempting to get the family to spy on the KKK and deciding to kill them to cover the evidence when they said no in the first place.

Seriously though the family had only attended a neighborhood Easter egg hunt by the way there at the Klansmen's camp near them on the mountain.

Now doesn't that suck?

Did you know it was a common patriot group who walked up and stopped that situation from killing all the evidence like they did in Waco Texas.

A common citizen group made them stop and as a result the government was busted and just said oops sorry hears a few million go away now. That poor family still can't go back on their land. We should have worked harder for the Weaver family remnant.

Get high on that for a moment though because if a patriot group could make them stop,..... we got some power buddy!!!

Another example to consider is that before Clinton and Reno killed American citizens in their home and church in Waco Texas, they were Christians, workers, even model citizens. After they killed women and children to satisfy their dark purpose the people who were murdered were called extremists, cult members and another suicide group.

It took years before we learned they were Christians and that the ATF agents had killed those poor American citizens and burned the proof. That the ATF blew close to a million dollars of your money in training for a week in Fort Hood Texas Army base against the law in preparation of the

murders.

The Church group had invited the ATF to send an agent by for an inspection on more than one occasion which would have been enough.

America the truth is the sheriff had offered to drive the ATF agent out for a visit. Its historical record that he felt no fear of them and liked them, even considered the group to be “a good group of loving and kind people.”

FLER footage showed us later that the dark agents were even shooting at those citizens who attempted to escape the flames. We can even see footage of presidential directed assassinations of some of the dark agents who were going to testify on Clinton. Clearly the murders are acted out by other dark agents. It’s all captured on film yet they had attempted to charge survivors with the murders.

The vile agents released a poorly made audio fabrication attempting to say the group planned the flames and did it to themselves. But even with Senator Schumer on all fours for the dark lord we heard the damning testimony of truth. The agents were murderers of women and children.

Worse yet the whole incident could have been avoided many times by the dark agents who chose the more destructive route because they were trying to film a training video.

The sick agents asked members inside the compound to film their own demise giving them movie cameras and putting cameras through holes they made in the building.

The ATF went in guns blazing in hopes of covering murders being acted out at the back of the complex to be blamed on the initial assault. The training video picked it up and yet no dark agent was ever charged.

Real Patriots have studied the testimony of the event in depth and know about the gas that was pumped in with tanks by agents that even asked that the Davidians not shoot at them while they administered the deadly gas.

The Group was so passive they took the attack and said that sadly God told them they were to stay long enough for the world to see the dark lord do what he does.

The ATF had the right and responsibility to take the appropriate court room measures, but they did not. They mooned and cursed at the women and children before they killed them all and destroyed evidence.

We now know of the gas grenades shot through the walls even striking children before bursting into flames. Tired bodies were run over with a tank while they slept. We have seen the twisted bodies that were caused to contract and convulse unto death because of the extreme amount of flammable gas the feds pumped into a room they knew was holding only women and children.

We have a lot of history to teach us how sick Satan can be when we let him have control. He always wants control doesn't he?

Here Satan grew smarter and stopped the Patriot groups at the gate so we couldn't stop anything. The dark force again with Lon in the ranks began to even hunt the group in the yard and on other buildings. Shooting unarmed men in the head on their way home from work and others while they worked their labors unknowing of the attack.

It's important to note that the trusted agents of the news helped dark people do dark things and we fell for it as a nation. So before you agree with the news and before you judge what a good reason for killing someone is you should stumble over the word killing, that is if there is any light in you.

It's because we are trained by the system not to kill them that get caught doing these things to us. We are told killing is wrong and granted if you ever have to do it I assure you it's not a parade. It's a difficult thing to do, or to have done once. It may haunt you forever.

But do you want it to be ok to simply kill cult members or klan members? Is it ok to lay in wait 3-9 months disrupting their lives awaiting your reason or chance to kill them?

What reason can a dark force feed you for justified murder? Then why is it ok under a different banner?

To quote a great man "Wouldn't a rose by another name smell just as sweet?" So murder is murder no matter what bull shit you polish it with. If it's wrong for you to do it's wrong for them to do, play by the same rules.

I want you to know some added information I found in study that most klansmen are fighting a socialist BIG government oppression of freedom. Does that sound like anyone you know? We also understand from this historical account that they attend Easter egg hunts, and so possibly they love family, children, and Jesus. Does that remind you of anyone?

I'm not defending them I'm saying be careful your understanding of the matrix doesn't give you reason to stumble.

Satin will give you a reason for why he is over here cut off from everyone's eyes killing and torturing people. Don't believe the sick bastard just bring the light and the eyes of others. Be the patriot who breaks up the tyranny and murder before they can destroy the evidence.

Listen Satin kills, he lies, he then covers up, and he never takes responsibility for who he is, what he is, or what he has done so learn to play by his rules. When you encounter his dark forces they may disrespect you like they are better than you and their time is more valuable. They will intimidate you; often they may threaten you even just in body language. They will "visit" others near you.

They will raise false concern over you and then threaten them not to talk about the visit. You may lose friends, family, and important connections during this time. Endure; know that nothing that the founding fathers did wasn't a risk to their own lives and well being. Sadly many lost their everything later for their stand. Every one of them knew it going in, when you steal power and money and control from evil, it has a price.

Now then, I will wait 30 seconds for the pussies reading this to put down this book and walk away.
Clearly your not made for this level of commitment. go home and love you family **and keep this mans secret.**

To you remaining, we are men here and like the forefathers we know what we are in for, and we are still here. This is what real men are drawn to do. Something other than continue to bend over and ignore this onslaught of evil. As for us we will serve. Now then, let's continue,

Notice, if Satin says your neighbor is worth investigating, maybe that translates that he is worth investing in. If you know he is a patriot record the conversation. See ID's take licenses numbers ask for a program directors name?

Enjoy your visit with satins little minions, make the piece of shit sweat, not on the cozy couch, that's for you and the dogs, let this shit sit in your most uncomfortable chair near the cat box. Feed him some stale cookies and spoiled milk for me will you. Then wash your hand and spray something antiseptic maybe say a prayer before laughing and calling me.

Study the incidents to fear or the ones you hear rumor of. Be educated and know the truth of these things.

Study and know that wild and crazy activism has been prevalent and prominent in our culture for hundreds of years and we often win our battles so do not be afraid. Learn of courage and honor. Practice the ways of manhood you men of a nation. Lead again with pride the families and ways of your community. Boldness when well directed is always valiant and valuable to those too weak to act.

Your numbers are small per group so that your not easily taken apart by loosing other groups affiliated with you. They are self lead and self enacted. In this way many continue where a few are lost.

In larger militant direct action groups we may see 20 men. They work well together and so it works but crowds draw attention so show caution with larger groups and movements.

Have a bond with your men that is assured. My patriot group said that if a member is taken from his home well that offending vehicle would never make it out of the caldasack. Do they mean it? I believe they do.

How to see the signs

In our region it was introduced to me that the patriots here in Texas use the old patriot markings to converse without words. So once we are active and strong we can leave marking for others to see and know we are with them.

Back in the days when a farmer couldn't afford to fence his entire field but he wanted to mark it as "Private Property" he would paint a post or a tree from 2 feet off the ground to about 6 feet off the ground the color purple. In this way he would convey that trespassing here could be dangerous to your health.

Still today the old patriots encourage the purple post. I'm sure your area might even be different however I felt at home when in Georgia I went to a home with a purple flag pole out front.

The man there delivered the rest for my understanding. If there were a black x on that post he would be considered militia, if there were a red cross there in my field of vision then he would have been a medical service patriot capable of patching me up.

If there were three stacked black circles he would be with ammo provision and with black stacked boxes he would have been dry good supply and maybe a meal. A Black arrow pointed up is a safe house while an A is transportation of patriots possible.

The flag pole usually means they are prior service and the flags or any banners convey messages as well. Usually propaganda force or activist group centers still use the yellow ribbon. I recommend we use the same universal system. Let it be known that anyone that comes snooping about as a result better be a patriot because he is admitting to having seen the warning of the purple post. There it is in short enough to save your life and get you in the door, now its up to you.

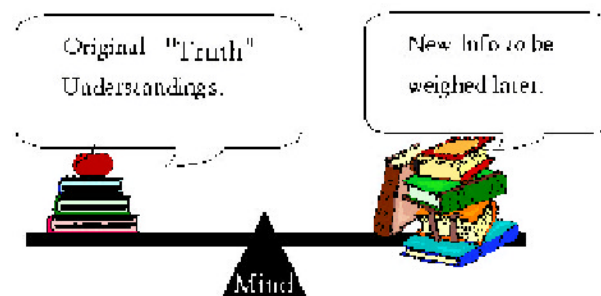

The Patriot Slide

Smart people, intuitive people sometimes are driven to investigate things further. Consequently when they find information counter to that of the controlled media, they feel compelled to share it with loved ones. If that information is counter to the controlled media, those people sometimes become ostracized for sharing counter information even though they are correct in their understanding of the revealed bigger picture. However it doesn't keep the frightened and closed minded from judging negatively those who where previously considered to be close and valued members of their inner circle of friends and family. There grows a void and few can remember what started it. I offer you this conclusion. The Patriot Slide is as much about mentally weighing everything you hear as it does with sharing truth wisely.

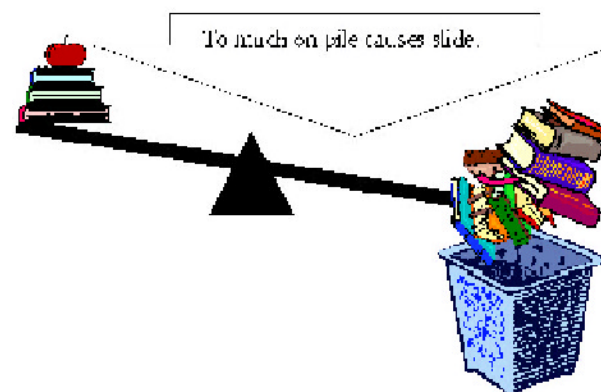

When we learn something that sounds counter to our accepted perceptions we will weigh it for validity, possibly putting it aside until we find the time to investigate the issue further.

If we later find this new thing is true we begin to trust the source of this counter information.

However, if we are fed more counter information before we accept the first information, it can begin to pile up. If nothing is ever accepted as new fact, if we refuse to accept this information and reweigh what we know as true in our mind, the entire waiting pile will slide off in to a mental trash can. That source will then be mentally labeled as a conspiracy buff or even a crazy person. No new information will be accepted by them.

Conversely, the person who can share one small piece of their understanding to some one of like interest, and then provide time and or proof of this thing, this counter idea, then the recipient will begin to associate the person with being a source of truth. Leaving them open to later additions to their understanding.

Without being jumped on and overwhelmed, the gradual feeding of truth builds up the bone where as the overwhelmed slide forever apart.
